

# The Child Who Bites and the Child Who was Bitten

1. Did the bite break through the skin?
2. Is blood (or body fluids) coming from the site?
3. If blood (or other body fluids) is present; wash the area with soap and water then cover with bandage.
4. Did the child who was biting get blood (or body fluids) in their mouth?
5. Have child rinse mouth out with plain water; then notify the parents of this child about the blood or body fluid exposure.
